

CR-020: Student able change their password

1. Change Request Details

Field	Details
Change Request ID	CR-020
Title	Student able change their password
Priority	High
Difficulty	Medium
Change Type	Frontend, Backend
Affected Version	Student Management System v1.0 baseline
Dependency	

2. Business Requirement

Currently, student passwords can only be assigned by the system administrator during the student registration process.

To improve security and user autonomy, the system must introduce a new feature in the student dashboard allowing students to securely change their own passwords.

3. Current Behavior

- Student password cannot changeable.
- System administrator can add password during the student registration.
- No change password currently available in the student dashboard.

4. Requested Change

Add a change password in the student dashboard.

The implementation must:

- Student Change their password.
- Password changing time Must login.
- Password, Re-enter password field are in the change password section.
- In password field value must match Re-enter password field.

5. Scope

In Scope

- Password, Re-enter password field in the change password section.
- During password change time authentication, authorization must.
- In password field value must match Re-enter password field.

Out of Scope

- Frontend changes.
- Backend changes.
- New API endpoints.
- Changes to authentication or authorization.

6. Expected / Potentially Affected Files

- `frontend\src\pages\StudentDashboardPage.jsx`
- `backend\src\models\studentModel.js`
- `backend\src\controllers\studentController.js`
- `backend\src\routes\studentRoutes.js`
- `frontend\src\components\ChangeStudentPassword.jsx` (New Components)

Students may modify additional files if required. Any additional files must be identified and justified in the Implementation Report.

7. Functional & Security Requirements

- **FR-001:** In password field value must match Re-enter password field.
- **FR-002:** New password stored in database as hash value.
- **FR-003:** Clearing the password, Re-enter password and autofocus password feild.
- **FR-004:** The interface shall display notification meassage.
- **SEC-001:** Existing administrator authentication and authorization shall remain unchanged.
- **SEC-002:** The new password encrypt to store.

8. Acceptance Criteria

The CR is successfully implemented when:

- **AC-001:** Student can change their password.
- **AC-002:** Password, Re-enter password fields in the student dashboard.
- **AC-003:** Existing authentication and authorization continue to work.

9. Expected Outcome

Student can changed their password securely.

10. Implementation Report Requirement

After implementation, the Final Exam Software Change Implementation Report shall include:

- Implementation summary.
- Affected files.
- Important technical/security changes.
- Test cases and results.
- Acceptance criteria verification.
- Relevant screenshots/evidence.
- Final status and outstanding issues.
