

CHANGE REQUEST APPROVAL

CR-001: Client-Side Search and Filtering of the Admin Student List

1. Change Request Details

Field	Details
Change Request ID	CR-001
Title	Client-Side Search and Filtering of the Admin Student List
Priority	High
Change Type	Frontend Enhancement

2. Change Summary

The proposed change adds client-side search and filtering to the administrator's student list.

Administrators will be able to search using registration number, name, or email while retaining the existing student CRUD functionality.

3. Impact Summary

The Impact Analysis identifies the overall impact as **Low**.

The change primarily affects the frontend administrator dashboard.

No database changes, new API endpoints, or changes to existing authentication and authorization are required.

4. Approval Conditions

If approved:

- Existing administrator authentication and authorization must remain unchanged.
- Search must operate on already-loaded student records.
- Search must support the required fields and case-insensitive matching.
- Edit and Delete must continue to use the correct `student_id`.
- Existing CRUD functionality must continue to work.
- Manual testing must be completed after implementation.
- Additional modified files must be documented in the Implementation Report.

5. Approval Decision

☒ **Approved**

☐ **Approved with Conditions**

☐ **Rejected**

☐ **Deferred**

6. Comments

Approved as proposed. No changes to the existing backend, database, authentication, or authorization are required.

7. Approval

Approver Name: Project Supervisor / Academic Supervisor

Designation: Project Supervisor

Signature: _____

Date: 5 October 2026

8. Authorization

Decision: Authorized for Implementation

Authorized By: Project Supervisor / Authorized Academic Reviewer

Signature: _____
